PROFESSIONAL SUMMARY

Experienced full-stack developer with 4+ years of experience, skilled in Typescript, Vue.js, Node.js, and SQL databases. Proven ability to lead agile teams, deliver scalable software solutions, and cooperate effectively in remote environments. A collaborative team player who takes ownership of deliverables, resolves incidents effectively, and continuously looks for ways to improve system quality and development processes.

EDUCATION

Brock University

Bachelor of Science (Honors) in Computer Science.

09/2016–04/2021

St. Catharines, ON.

- Dean's Honour List, AI Publication.

EXPERIENCE

Experience Driven

Project Manager - System Architect

02/2024–Present

St. Catharines, ON.

- Facilitate agile sprint planning and resource tracking with Jira, promoting efficiency and clarity across design, development, and QA teams.
- Implemented custom data collection systems using Node.js and Directus to streamline customer meetings, boosting company prospects by 100%.
- Lead co-ordination with QA teams, utilizing Jira and Playwright to conduct testing, bug tracking, and user acceptance processes with clients to ensure successful project releases.
- Collaborated directly with clients to gather technical and operational requirements, translating business processes into scalable full-stack application workflows.
- Architected and implemented full-stack systems using Express, PostgreSQL, and cloud infrastructure on GCloud, balancing scalability, maintainability, and operational reliability.
- Integrated LeadFlow and Zapier workflows to automate CRM updates, transactional notifications, and operational processes triggered by user lifecycle events.

Software Developer

11/2021–Present

- Created internal software using Nuxt 3 and Tailwind CSS to assist with accounting, which generated invoices, increased quoting accuracy to nearly 90%, and reduced staff workload by 50%.
- Conducted code reviews as team lead for Vue 3 and TypeScript via Jira to ensure adherence to industry coding practices and development standards.
- Led and completed 6 end-to-end client projects, handling all requirements, including gathering user stories, development, quality assurance, and post-development support.
- Developed Node.js-based ETL pipelines to migrate offline company processes online to allow better data collection for trend analysis.
- Designed and implemented relational PostgreSQL database schemas supporting complex onboarding workflows, role-based functionality, and operational tooling.

SKILLS

Languages:

HTML, CSS, Typescript, Vue.js, SQL, PostgreSQL, React.js (familiar), React Native (familiar)

Systems:

Web-based software solutions, desktop and mobile-friendly design, REST APIs, GraphQL (familiar)

Development:

CI/CD, debugging and monitoring, code review, technical documentation

Tools:

Git, Supabase, Directus, GCloud, Azure (familiar)
